

RISE & SHINE

RS6000 HYBRID LAMP STREET

- Led 60 watt
- Solar panel 68 watt
- Battery 362WH lithium LifePo4
- Battery recharge time 6 hours
- Battery power backup 3 days
- ip class ip66
- Material Aluminium
- Dimensions in millimetres: L.1356xB.315xH.206
- Operating temp. -20 to +60
- Light colour tone kelvin 6500K optional
- Light intensity in lumen 7200
- Height of installation 7 to 10 metres
- Distance between masts 28 metres
- Mast diameter ø40 to ø80 millimetres
- Light sensor day and night/ auto on-off
- Certifications CE, ROHS, IES,TUV, MSDS, ISO 9001, IK08

Advantages:

When light is insufficient to charge the solar lamp's battery, it will automatically switch to accept normal AC current.

The lamp features a 12 metre 2x1 rubber cable, with a cable outlet in the middle of the mast adapter.

Expect power savings of 70% when using solar power.

All the lamp's internal and external nuts, bolts and washers are made of A4/316 stainless steel.
